Seville

"Protecting public and environmental health by understanding and communicating toxicology"

## Detailed Programme

Status: 01 September, 2016

Sunday, 4 September, 2016	
08h00 - 19h00	Congress Registration
10h00 - 16h00	<b>Continuing Education Courses (CEC)</b> including coffee & lunch breaks
10h00 - 16h00 <b>PARIS</b>  <b>ELSEVIER</b>	<p><b>CEC 1: Sponsored by ELSEVIER "Integrative Approaches to Testing and Assessment (IATA) for skin sensitization: from theory to practice"</b></p> <p><i><b>Chairs:</b> Janine Ezendam, The Netherlands and Laura Rossi, Finland</i></p> <p>Much progress has been made in the development, validation and regulatory acceptance of non-animal test methods for skin sensitisation hazard identification. For full replacement of the currently used animal tests, integration of data from multiple alternative test methods is needed to mechanistically cover the complexity of the skin sensitization process. The OECD Adverse Outcome Pathway (AOP) describes the molecular initiating event and subsequent key events of the induction of skin sensitization. This AOP is used as a mechanistic anchor to develop integrated and defined approaches to testing and assessment for skin sensitization. In this CEC, participants are informed on how non-animal test methods can be used for skin sensitization testing in the context of the REACH regulation. Furthermore, two recently published OECD guidance documents on defined and integrated approaches to testing and assessment will be presented, explaining definitions, general principles and generic examples. Case studies that illustrate different defined approaches for skin sensitization are provided and their utility for safety assessment of cosmetics is presented. The role of computational and statistical tools in integrated approaches is covered as well. Overall, this CEC course will provide the most recent knowledge on defined and integrative approaches for skin sensitization and the way they can be applied in practice.</p> <p>10:00 - 10:45 <b>CEC 1-1</b> <b>How to use non-animal test methods for skin sensitisation in the context of REACH Regulation</b></p> <p><u>Laura H Rossi</u> Evaluation, European Chemicals Agency, Helsinki, Finland</p> <p>10:45 - 11:30 <b>CEC1-2</b> <b>OECD guidance on the reporting of defined approaches and individual</b></p>

	<p><b>information sources to be used within Integrated Approaches to Testing and Assessment (IATA) for Skin Sensitization</b></p> <p><u>Silvia Casati</u> EURL ECVAM, Joint Research Centre, European Commission</p> <p>11:30 – 11:45 Coffee Break</p> <p>11:45 - 12:30 <b>CEC1-3</b> <b>From theory to practice: case studies illustrating different defined approaches for testing and assessment for skin sensitization</b></p> <p><u>Janine Ezendam</u> <i>National Institute for Public Health and the Environment (RIVM)</i></p> <p>12:30 – 14:00 Lunch Break</p> <p>14:00 - 14:45 <b>CEC1-4</b> <b>Utility of integrated non-animal approaches for skin sensitisation for safety assessment of cosmetics</b></p> <p><u>Sebastian Hoffmann</u> <i>Consultant of Cosmetics Europe / SEH Consulting Services, Germany</i></p> <p>14:45 - 15:30 <b>CEC1-5</b> <b>Computational tools and their role in integrative approaches</b></p> <p><u>Steve Enoch</u> School of Pharmacy and Biomolecular Sciences, UK</p> <p><b>Wrap-up and final questions</b> 15:30-15:45</p>
<p>10h00 - 16h00 <b>MADRID</b></p>	<p><b>CEC 2: Toxicokinetics</b> <i>Chairs: Nancy Claude, France, and Eva Cecilie Bonefeld Jorgensen, Denmark</i></p> <p>Toxicokinetics is a science that underpins the basis of toxicology, and provides a basis for mechanistic understanding in toxicology. This session seeks to provide an overview of toxicokinetics, whilst updating on areas that are seeing significant developments. The intention is to provide information that is tailored for use in toxicology,</p>

be it to support safety assessment of pharmaceuticals, pesticides, biocides or to optimise testing strategies in REACH. The session starts with an overview of ADME concepts, before dealing with how to choose bioanalytical methods for tox studies, and the use of micro-sampling to generate optimal information. Approaches for in vitro to in vivo extrapolation are covered, and the integration of PK information in PBPK modelling is described. Participants can expect to have an update of their general theoretical understanding of toxicokinetics, as well as a more detailed understanding of the practical application of the specific methodologies discussed.

10:00 - 10:30

### **CEC2-1**

#### **Basic ADME in non-clinical drug discovery & development**

Richard John Weaver

Richard J. Weaver. Servier Group, France

10:30 - 11:00

### **CEC2-2**

#### **Applying the right level of bioanalytical method validation for PK analysis in support of preclinical (tox) studies**

Philip Timmerman

Philip Timmerman, Janssen R&D, on behalf of EBF

11:00 - 11:30

Coffee Break

11:30 - 12:00

### **CEC2-3**

#### **Microsampling for Toxicokinetic Studies**

Josephine Burnett

Department of Toxicology, Covance Laboratories Ltd, Harrogate, UK

12:00 - 13:30

Lunch Break

13:30 - 14:00

### **CEC2-4**

#### **In vitro kinetics in quantitative in vitro-in vivo extrapolation**

Nynke I. Kramer

Institute for Risk Assessment Sciences, Utrecht University

14:00 - 14:30

### **CEC2-5**

#### **An Introduction to PBPK Modelling**

	<p><u>George Demetrius Loizou</u> Health Risks, Health and Safety Laboratory, UK</p>
<p>10h00 - 16h00 <b>BRUSELAS CD</b></p>	<p><b>CEC 4: Evaluation of food additives in Europe: Point of the art</b> <i>Chairs: Claudia Roncanciopena, Italy, and Pr. D. Parent Massin, France</i></p> <p>All food additives on the EU market are subject to an evaluation programme according to EU regulation N°257/2010 which is expected to be finalized by 2020 and is performed by the Additives and Nutrient Sources (ANS) Panel of EFSA. The programme started by the evaluation of food colours, preservatives and thickeners. While sweeteners has to be considered at the end of the program, the re-evaluation of aspartame has been asked by European Parliament to be considered earlier. During this workshop, the point of the art of these evaluations will be presented by member of the ANS Panel from EFSA.</p> <p>10:00 - 10:30 <b>CEC4-1</b> <b>Principles of re-evaluation of food additives in Europe: Point of the Art of the re-evaluation of sweeteners</b></p> <p><u>Aljcia Mortensen</u><sup>1</sup>, Fernando Aguilar<sup>1</sup>, Riccardo Crebelli<sup>1</sup>, Alessandro Di Domenico<sup>1</sup>, Maria José Frutos Fernandez<sup>1</sup>, Paolo Colombo<sup>2</sup>, Alexandra Tard<sup>2</sup>, Claudia Roncancio Peña<sup>2</sup></p> <p><sup>1</sup>Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS), European Food Safety Authority (EFSA), Parma, Italy <sup>2</sup>European Food Safety Authority, Food Ingredients and Packaging Unit (FIP), Parma, Italy</p> <p>10:30 - 11:00 <b>CEC4-2</b> <b>Food colours: Point of the Art evaluation</b></p> <p><u>Agneta Oskarsson</u><sup>1</sup>, Ruud Woutersen<sup>2</sup>, Jean Charles Leblanc<sup>2</sup>, Peter Moldeus<sup>2</sup>, David Gott<sup>2</sup>, Ursula Gundert Remy<sup>2</sup>, Federica Lodi<sup>3</sup>, Stravoula Tasiopoulou<sup>3</sup></p> <p><sup>1</sup>Department of Biomedical Sciences and Veterinary Public Health, Swedish University of Agricultural Sciences, Uppsala, Sweden <sup>2</sup>Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS), European Food Safety Authority (EFSA), Parma, Italy <sup>3</sup>European Food Safety Authority, Food Ingredients and Packaging Unit (FIP), Parma, Italy</p> <p>11:00 – 11:30 Coffee Break</p> <p>11:30 - 12:00 <b>CEC4-3</b> <b>Thickeners and preservatives: Point of the Art of the re-evaluation</b></p>

	<p><u>Dominique Parent Massin</u><sup>1</sup>, Birgit Dusemund<sup>1</sup>, Oliver Lindtner<sup>1</sup>, Pasquale Mosesso<sup>1</sup>, Pierre Galtier<sup>1</sup>, Anna Christodoulidou<sup>2</sup>, Juho Lemmetyinen<sup>2</sup>  <sup>1</sup>Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS), European Food Safety Authority (EFSA), Parma, Italy  <sup>2</sup>European Food Safety Authority, Food Ingredients and Packaging Unit (FIP), Parma, Italy</p> <p>12:00 – 13:30 Lunch Break</p> <p>13:30 - 14:00  <b>CEC4-4</b>  <b>Emulsifiers: Point of the Art evaluation</b></p> <p><u>Matthew C Wright</u><sup>1</sup>, Ivan Stankovic<sup>2</sup>, Ine Waalkens Berendsen<sup>3</sup>, Ruud A Woutersen<sup>3</sup>, Maged Younes<sup>3</sup>, Ana Maria Rincon<sup>4</sup>, Dario Battacchi<sup>4</sup>  <sup>1</sup>Institute Cellular Medicine, Newcastle University, UK  <sup>2</sup>Faculty of Pharmacy, University of Belgrade, Serbia  <sup>3</sup>Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS), European Food Safety Authority (EFSA), Italy  <sup>4</sup>European Food Safety Authority, Food Ingredients and Packaging Unit (FIP), Italy</p>
<p>10h00 - 16h00  <b>BRUSELAS EF</b></p>	<p><b>CEC 5: In vivo chemical genotoxin exposure and DNA damage in humans measured using the lymphocyte cytokinesis-block micronucleus (CBMN) assay</b>  <b>Chairs: Michael Fenech, Australia, and Nina Holland, USA</b></p> <p>The lymphocyte cytokinesis-block micronucleus (CBMN) assay is one of the most commonly used methods to measure chromosomal DNA damage in human populations and has been shown to be associated prospectively with cancer risk. However, there is currently considerable debate about which biomarker assays are suitable for measuring the DNA damage effects of in vivo exposure to chemical genotoxins in humans.</p> <p>Over the past 30 years at least 295 papers have reported case/control studies on the use of the lymphocyte cytokinesis-block (CBMN) assay to measure DNA damage in humans exposed to various types of chemicals that may be genotoxic in vivo. However this large body of literature has never been comprehensively examined to determine whether the CBMN assay is effective in detecting DNA damage induced by in vivo exposure to different classes of known chemical genotoxins in human populations.</p> <p>In this workshop we shall be reporting the outcomes of systematic reviews and meta-analyses of these bio-monitoring studies of exposure to different classes of chemical genotoxins using the lymphocyte CBMN assay and comparing its performance to detect induced DNA damage relative to other genotoxicity assays that are also commonly used.</p> <p>Furthermore, current knowledge on the mechanisms by which chemical genotoxin exposure may cause the induction of micronuclei and other nuclear anomalies in vivo and ex vivo will be discussed. The possibility of further improving the utility of the lymphocyte CBMN assay to measure DNA damage caused by chemical genotoxin exposure will be explored.</p> <p>10:00 - 10:30</p>

### CEC5-1

#### **Pesticides and herbicides - Results of a systematic review of human exposure studies using the lymphocyte CBMN assay**

Claudia Bolognesi<sup>1</sup>, Nina Holland<sup>2</sup>

<sup>1</sup>Environmental Carcinogenesis Unit, IRCCS AUO San Martino IST-

National Cancer Research Institute, Genova, Italy

<sup>2</sup>Nina Holland, School of Public Health, University of California, Berkeley, California, USA

10:30 - 11:00

### CEC5-2

#### **Heavy metals: Results of a systematic review of human exposure studies using the lymphocytes micronucleus assay**

Siegfried Knasmueller, Miroslav Mišík, Michael Kundi, Georg Wultsch, Armen Nersesyan

Institute of Cancer Research, Department of Internal Medicine I, Medical University of Vienna, Vienna, Austria

11:00 – 11:30

Coffee Break

11:30 - 12:00

### CEC5-3

#### **Exposure to petroleum, petroleum derivatives PAHs and traffic fumes - Results of a systematic review of human studies using the lymphocyte CBMN assay**

Radim Sram

*Institute of Experimental Medicine AS CR, Prague, Czechia*

12:00 – 13:30

Lunch Break

13:30 - 14:00

### CEC5-4

#### **Biomonitoring of genotoxic effects for human exposure to nanomaterials: The challenge ahead**

Micheline Kirsch Volders, Laetitia Gonzalez

Laboratory of cell genetics, Vrije Universiteit Brussel, Brussels, Belgium

14:00 - 14:30

### CEC5-5

#### **All other chemicals – Results of systematic reviews of human exposure studies using the lymphocyte CBMN assay**

Stefano Bonassi

	<i>Clinical and Molecular Epidemiology IRCCS San Raffaele Pisana, Rome, Italy</i>
10h00 - 16h00 <b>BRUSELAS GH</b>	<p><b>CEC 6: Green toxicology - A complementary 'qua non' activity for the sustainable development of chemicals and drugs in the 21st century</b></p> <p><b><i>Chairs:</i> Harald Krug, Switzerland and Bensu Karahalil, Turkey</b></p> <p>Green toxicology is the application of predictive toxicology to the production of chemicals with the specific intent of improving their design for hazard reduction. The twelve principles of green chemistry outline a strategy to reduce hazard through molecular and process design. Reducing toxicity is at the core of green chemistry and sustainability, therefore the input of toxicologists early in the chemical enterprise is essential to inform the choices of molecular designers in selecting less hazardous design strategies. Information derived from mechanistic and computational toxicology combined forms the nexus between toxicology and green chemistry. Each group is trained to examine, understand and describe aspects of the structure hazard relationship from a narrow perspective. This course will provide a forum for collaboration among academia and industry working in complementary fields to discover common ground in the quest for safer chemicals.</p> <p>10:00 - 10:30 <b>CEC6-1</b></p> <p><b>Twenty first century toxicology and safer chemical design</b></p> <p><u>Thomas Hartung</u> Johns Hopkins Bloomberg School of Public Health, USA</p> <p>10:30 - 11:00 <b>CEC6-2</b></p> <p><b>How the Greenpeace Detox campaign drives the fashion industry towards sustainable supply chains</b></p> <p><u>Anne Bonhoff</u> UL Environment</p> <p>11:00 - 11:30 Coffee Break</p> <p>11:30 - 12:00 <b>CEC6-3</b></p> <p><b>Green toxicology and chemistry: Hand in glove</b></p> <p><u>Bennard Van Ravenzwaay</u>, Hennicke Kamp, Robert Landsiedel, Tzutzy Ramirez all authors BASF SE, Ludwigshafen/Germany</p> <p>12:00 - 13:30 Lunch Break</p>

	13:30 - 14:00 <b>CEC6-4</b> <b>Green Toxicology - The Future in sustainability in chemical and material development</b>  <u>Harald F. Krug</u> Empa - Swiss Federal Laboratories for Materials Science and Technology, St. Gallen, Switzerland & NanoCASE GmbH, Engelburg, Switzerland
16h00	<b>Opening of the Exhibition</b>
17h00 - 19h00 <b>AUDITORIUM I</b>	<b>Opening Ceremony- AUDITORIUM I</b> <i>Chair:</i> Aristidis Tsatsakis, President of EUROTOX, Greece  17.00-17.30 <b>Welcome Address</b> by Ali Esat Karakaya President of the EUROTOX 2016 Congress, Turkey  <b>Welcome Address</b> by Aristidis Tsatsakis President of EUROTOX, Greece  17:30 – 17:45 <b>EUROTOX Merit Award Ceremony</b>  18:00 – 19:00 <b>Opening Lecture</b> <i>Chair:</i> Ali Esat Karakaya, Turkey  <b>Nanomedicines for neurological disorders</b> Turgay Dalkara <i>Hacettepe University, Institute of Neurosciences, Ankara, Turkey</i>
19h00 - 21h00	<b>Welcome Reception- EXHIBITION AREA</b>
<b>Monday, 5 September, 2016</b>	
08h00 - 19h00	Congress Registration   08h30 – 18h00 Exhibition
08h30 - 09h30 <b>AUDITORIUM I</b>	<b>Keynote Lecture</b> <i>Chair:</i> Ruth Roberts, UK  <b>K-1</b> <b>Evolution of Computational Toxicology: From Primitive Beginnings to Sophisticated Application</b>  Russell S. Thomas <i>Environmental Protection Agency, USA</i>
09h30 - 10h00	Coffee Break, Exhibition and Poster Viewing
10h00 - 12h00 <b>AUDITORIUM II</b>	<b>Symposium S01: Adverse drug reactions: Mechanisms and preclinical testing</b> <i>Chairs:</i> Hilmi Orhan, Turkey, and Fred Guengerich, USA  <b>S01-1</b> <b>Mechanisms of adverse drug reactions: Metabolic and others</b>

	<p><u>Frederick Peter Guengerich</u> Vanderbilt University School of Medicine, Nashville, TN, United States</p> <p><b>S01-2</b> <b>Role of glutathione transferases and quinonoxidoreductases in protection against reactive drug metabolites</b></p> <p><u>Jan N.M. Commandeur</u> VU University Amsterdam, Molecular Toxicology, Amsterdam, The Netherlands</p> <p><b>S01-3</b> <b>From intravital imaging to in vitro test systems</b></p> <p><u>Jan G. Hengstler</u> Leibniz Research Centre for Working Environment and Human Factors IfADo -Dortmund - Germany</p> <p><b>S01-4</b> <b>Involvement of mitochondria in drug-induced toxicities</b></p> <p><u>Hilmi Orhan</u> Department of Pharmaceutical Toxicology, Faculty of Pharmacy, Ege University, Izmir, Turkey</p>
<p>10h00 - 12h00 <b>AUDITORIUM III</b></p>	<p><b>Symposium S02: A multidisciplinary approach for novel developmental neurotoxicity risk assessment contributing to the AOP concept</b> <i>Chairs: Eugenio Vilanova, Spain and Anna Price, Italy</i></p> <p><b>S02-1</b> <b>Systematic review on methods for developmental neurotoxicity evaluation based on an EFSA Report</b></p> <p><u>Andrea Terron</u><sup>1</sup>, Stefan Masjosthusman<sup>2</sup>, Henrich Alm<sup>2</sup>, Jenny Baumann<sup>2</sup>, Lieve Geerts<sup>4</sup>, Helen Hakansson<sup>3</sup>, Hilda Witters<sup>4</sup>, Ellen Fritsche<sup>2</sup> <sup>1</sup>European Food Safety Authority (EFSA), Parma, Italy <sup>2</sup>IUF, Dusseldorf, Germany <sup>3</sup>Karolinska Institutet, Stockholm, Sweden <sup>4</sup>VITO, Boeretang, Belgium</p> <p><b>S02-2</b> <b>3D Models and omics approaches to study developmental neurotoxicity</b></p> <p><u>Helena T Hogberg</u><sup>1</sup>, Mounir Bouhifd<sup>2</sup>, Ozge Cemiloglu Ulker<sup>3</sup>, Rita De Cassia Da Silveira E Sa<sup>4</sup>, Georgina Harris<sup>1</sup>, Andre Kleensang<sup>1</sup>, Alexandra Maertens<sup>1</sup>, David Pamies<sup>1</sup>, Lena Smirnova<sup>1</sup>, Liang Zhao<sup>1</sup>, Hartung Thomas<sup>1</sup> <sup>1</sup>Center for Alternatives to Animal Testing, Johns Hopkins Bloomberg School of Public Health, Baltimore, USA <sup>2</sup>Joint Research Center, European Commission, Ispra, Italy <sup>3</sup>Department of Toxicology, Faculty of Pharmacy, University of Ankara, Ankara, Turkey <sup>4</sup>Department of Physiology and Pathology, Federal University of Paraiba, Paraiba,</p>

### Oral Communication Session 1

(10 min presentations)

**Chairs:** Eren Özçağlı, Turkey and Emanuela Corsini, Italy

#### OSC01-009

#### Development of an {in vitro} inhalation toxicity test using the EpiAirway model for improved protection of human health

P. J. Hayden<sup>1</sup>, G. R. Jackson, Jr.<sup>1</sup>, A. Hunter<sup>1</sup>, S. Coughlin<sup>1</sup>, A. Maione<sup>1</sup>, S. Letasiova<sup>2</sup>, H. Kandarova<sup>2</sup>

<sup>1</sup>MatTek Corporation, Ashland, MA, USA

<sup>2</sup>MatTek In Vitro Life Science Laboratories, Bratislava, Slovak Republic

#### OSC02-011

#### In vitro validation of in vivo assessment of toxicity and antidotes to Cleistanthus collinus poisoning -a common suicidal phytotoxin in India

G. S. Chandra

Pharmacovigilance Laboratory For Animal Feed And Food Safety centre For Animal Health Studies, Tanuvas, madhavaram Milk Colony, chennai – 600 051. tamilnadu, India

#### OSC01-008

#### Measuring apoptosis in real-Time by linking luciferase fragments to annexin V

T. Riss<sup>1</sup>, K. Kupcho<sup>1</sup>, J. Shultz<sup>1</sup>, J. Hartnett<sup>1</sup>, R. Hurst<sup>1</sup>, W. Zhou<sup>2</sup>, A. Niles<sup>1</sup>

<sup>1</sup>Promega Corporation, Madison, Wisconsin, USA

<sup>2</sup>Promega Biosciences, San Luis Obispo, California, USA

#### OSC02-006

#### Evaluation of read-across argumentation according to the ECHA Read-Across Assessment Framework (RAAF)

A. Richarz, E. Berggren, A. Worth

European Commission Joint Research Centre, IHCP, Systems Toxicology Unit & EURL ECVAM, Ispra, Italy

#### OSC01-010

#### Exposome analysis of polyaromatic hydrocarbons

D. Sarigiannis<sup>1</sup>, S. Karakitsios<sup>1</sup>, E. Handakas<sup>1</sup>, A. Gotti<sup>2</sup>

<sup>1</sup>Environmental Engineering Laboratory, Department of Chemical Engineering, Aristotle University of Thessaloniki, Thessaloniki, Greece

<sup>2</sup>Environmental Health Engineering, Institute of Advanced Study, Pavia, Italy

16h00 - 18h00  
AUDITORIUM I

### OSC02-001

#### Mercury Human health risk assessment among Lebanese youth

H. R. Dhaini<sup>1</sup>, P. J. Obeid<sup>2</sup>, S. A. Fares<sup>3</sup>, G. N. Farhat<sup>4</sup>, B. El Khoury<sup>2</sup>, R. M. Nassif<sup>5</sup>

<sup>1</sup>Department of Environmental Health, American University of Beirut, Beirut, Lebanon

<sup>2</sup>Department of Chemistry, University of Balamand, Al Kurah, Lebanon

<sup>3</sup>Hariri School of Nursing, American University of Beirut, Beirut, Lebanon

<sup>4</sup>Hubert Department of Global Health, Emory University, Atlanta, Georgia, USA

<sup>5</sup>Medical Laboratory Sciences Program, University of Balamand, Beirut, Lebanon

### OSC02-003

#### Thresholds of Toxicological Concern – Overview of ongoing scientific developments

S. Escher<sup>4</sup>, C. Turek<sup>1</sup>, S. Campos<sup>2</sup>, J. Edwards<sup>3</sup>, P. Ferret<sup>5</sup>, N. Höfer<sup>6</sup>, K. Kosemund<sup>7</sup>, J. Schnabel<sup>8</sup>, B. Van Ravenzwaay<sup>9</sup>, H. M. Hollnagel<sup>10</sup>

<sup>1</sup>Corporate drug safety, WALA Heilmittel GmbH, Bad Boll, Germany

<sup>2</sup>Food Contact Materials, The Coca-Cola Company, Brussels, Belgium

<sup>3</sup>NIC-RD/HN Toxicology and Kinetics, DSM Nutritional Products Ltd, Kaiseraugst, Switzerland

<sup>4</sup>Fraunhofer Institute of Toxicology and Experimental Medicine (ITEM), Hannover, Germany

<sup>5</sup>Pierre Fabre Dermo-Cosmétique, Toulouse, France

<sup>6</sup>Südzucker AG, Mannheim, Germany

<sup>7</sup>Global Product Stewardship, Central Product Safety, Procter & Gamble Service GmbH, Schwalbach am Taunus, Germany

<sup>8</sup>Givaudan Schweiz AG, Kempthal, Switzerland

<sup>9</sup>BASF SE, Ludwigshafen, Germany

<sup>10</sup>Toxicology and Environmental Research & Consulting, Dow Europe GmbH, Horgen, Switzerland

### OSC02-004

#### Concentration-response analysis of high throughput data obtained in embryos cultured in vitro in presence of a binary mixture of two antifungal azoles (triadimefon and flusilazole)

F. Metruccio<sup>1</sup>, M. Battistoni<sup>2</sup>, F. Di Renzo<sup>2</sup>, A. Moretto<sup>3</sup>, E. Menegola<sup>2</sup>

<sup>1</sup>ICPS, ASST Fatebenefratelli Sacco, Milano- Italy

<sup>2</sup>Università degli Studi di Milano, Dipartimento di Bioscienze, Milano-Italy

<sup>3</sup>Università degli Studi di Milano, Dipartimento di Scienze Biomediche e Cliniche, Milano- Italy

### OSC01-003

#### The pulmonary toxicity in nanoscale carbon black-exposed workers

	<p><u>R. Zhang</u><sup>1</sup>, <u>Z. Pei</u><sup>2</sup>, <u>Y. Zheng</u><sup>3</sup>  <sup>1</sup>Department of Toxicology, School of Public Health, Hebei Medical University, Shijiazhuang, China  <sup>2</sup>School of Medicine, China Three Gorges University, Yichang, China  <sup>3</sup>National Institute for Occupational Health and Poison Control, Chinese Center for Disease Control and Prevention, Beijing, China</p> <p><b>OSC01-004</b>  <b>Toxicity of Cerium Dioxide Nanoparticles – Effects from a 90-Day Inhalation Study</b></p> <p><u>D. Schwotzer</u>, M. Niehof, T. Hansen, T. Tillmann, H. Ernst, O. 20h00 - 24h00	<b>Gala Dinner - MONASTERIO MONTE CARMELO</b>		
<b>Wednesday, 7 September, 2016</b>			
08h00 - 14h00	Congress Registration	08h00 - 14h00	Exhibition
08h00 - 09h00 <b>AUDITORIUM I</b>	<p><b>Keynote Lecture</b>  <i>Chair: Sibel Özden, Turkey</i></p> <p><b>K-5</b>  <b>Precautionary Principles in risk management of chemicals and expectations on toxicologists</b></p> <p><u>Heidi Foth</u>, Jan Wiese, Felix Glahn          Institute of Environmental Toxicology, Martin Luther University Halle Saale</p>		
09h00 - 11h00 <b>AUDITORIUM II</b>	<p><b>Symposium S11: Reflections on the application of "Chemical-Specific Adjustment Factors" (CSAF) in quantitative risk assessment</b>  <i>Chairs: Richard Brown, Switzerland and Bette Meek, Canada</i></p> <p><b>S11-1</b>  <b>Analysis of international experience on CSAFs and potential path forward</b></p> <p><u>Bette Meek</u>          McLaughlin Centre, University of Ottawa, Ottawa, Canada</p> <p><b>S11-2</b>  <b>Harmonization of CSAFs with other research efforts including integration with AOP and MOA frameworks</b></p> <p><u>Alan R Boobis</u>          Department of Medicine, Imperial College London, UK</p> <p><b>S11-3</b>  <b>Analysis of published Chemical Specific Adjustment Factors (CSAFs) and other data derived factors: obstacles and opportunities</b></p>		

	<p><u>Joanne Caroline English</u> NSF International</p> <p><b>S11-4</b> <b>From Default Uncertainty Factors to CSAFs: Past, Present and Future in food safety</b></p> <p><u>Jean Lou Christian Michel Dorne</u> European Food Safety Authority, Scientific Committee and Emerging Risks Unit, Parma, Italy</p> <p><b>S11-5</b> Panel Discussion: Enhancing uptake in risk assessment All Speakers</p>
<p>09h00 - 11h00 <b>AUDITORIUM III</b></p>	<p><b>Symposium S12: Integration of in vitro systems to predict toxicity from repeated exposure</b> <i>Chairs: Miyoung Yoon, USA, and Bas Blaauboer, The Netherlands</i></p> <p><b>S12-1</b> <b>Overview: integrated in vitro systems for toxicity assessment from repeated exposure</b></p> <p><u>Harvey Clewell</u> ScitoVation, Research Triangle Park, North Carolina, USA</p> <p><b>S12-2</b> <b>In vitro models of the human airway epithelium for inhalation toxicity testing</b></p> <p><u>Samuel Constant</u> Epithelix, Geneva, Switzerland</p> <p><b>S12-3</b> <b>Liver bioreactor and incorporation of metabolism and biokinetics into the integrated cell-based toxicity system</b></p> <p><u>Miyoung Yoon</u><sup>1</sup>, Martin Phillips<sup>1</sup>, David Billings<sup>1</sup>, Pergentino Balbuena<sup>1</sup>, Joseph Shim<sup>1</sup>, Erin Burgunder<sup>1</sup>, Jenny Pedersen<sup>2</sup>, Jeffrey Enders<sup>1</sup>, Jeffrey Macdonald<sup>3</sup>, Melvin Andersen<sup>1</sup>, Harvey Clewell<sup>1</sup> <sup>1</sup>ScitoVation, LLC, RTP, NC, USA <sup>2</sup>The Hamner Institutes for Health Sciences, RTP, NC, USA <sup>3</sup>University of North Carolina, Chapel Hill, NC, USA</p> <p><b>S12-4</b> <b>Integrated Human Multi-Organ Culture Plate for Estimating Systemic Toxicity In Vitro</b></p> <p><u>James M Mckim</u><sup>1</sup>, Heidi Baas<sup>1</sup>, Miyoung Yoon<sup>2</sup>, Harvey Clewell<sup>2</sup>, Melvin E Andersen<sup>2</sup> <sup>1</sup>IonTox, LLC <sup>2</sup>ScitoVation</p>

	<p><b>S12-5</b>  <b>Integrating toxicodynamics and biokinetics: Use of in vitro biomarkers</b></p> <p><u>Paul Jennings</u>          Department of Physiology and Medical Physics, Medical University of Innsbruck, Austria</p>
<p>09h00 - 11h00  <b>MADRID</b></p>	<p><b>Symposium S13: Toxicology of organophosphorus nerve agents (OPA) as the chemical weapons</b>  <i>Chairs: Mahdi Balali-Mood, The Netherlands and Shahriar Khateri, The Netherlands</i></p> <p><b>S13-1</b>  <b>Clinical management of acute poisoning with organophosphorus nerve agents</b></p> <p><u>Mahdi Balali Mood</u>          Medical Toxicology Research Center, Faculty of Medicine, Mashhad University of Medical Sciences, Mashhad, Iran</p> <p><b>S13-2</b>  <b>Environmental exposure to nerve agents</b></p> <p><u>Slavica Vučinić</u>          National Poison Control Centre, Military Medical Academy, Medical faculty University of Defense, Belgrade, Serbia</p> <p><b>S13-3</b>  <b>Nerve agents and chemical disarmament</b></p> <p><u>Shahriar Khateri</u>          Organization for the Prohibition of Chemical Weapons, OPCW</p> <p><b>S13-4</b>  <b>Promoting the work of the OPCW through toxicology societies</b>          Aristidis Tsatsakis  <i>Laboratory of Forensic Science&amp;Toxicology, Medical School, University of Crete, Heraklion, Greece</i></p>
<p>09h00 - 11h00  <b>PARIS</b></p>	<p><b>Workshop W09: Deciphering the role of the aryl hydrocarbon receptor in toxicity and its emerging functions in physiology</b>  <i>Chairs: Jan Vondracek, Czechia, and Dieter Schrenk, Germany</i></p> <p><b>W09-1</b>  <b>Insights into novel functions of the dioxin receptor in cell differentiation and pluripotency</b></p> <p><u>Pedro M Fernández Salguero</u><sup>1</sup>, Nuria Moreno Marin<sup>1</sup>, Antonio Morales Hernandez<sup>1</sup>, Ana Nacarino Palma<sup>1</sup>, Beroe Paniagua<sup>1</sup>, Ascensión Infante Campos<sup>2</sup>, Aurea Gomez Duran<sup>2</sup>, Inmaculada Catalina Fernández<sup>2</sup>, Jaime M. Merino<sup>1</sup>  <sup>1</sup>Department of Biochemistry and Molecular Biology, Faculty of Sciences, University of Extremadura, Badajoz, Spain</p>

	<p><sup>2</sup>Department of Pathology, Infanta Cristina University Medical Center, Badajoz, Spain</p> <p><b>W09-2</b> <b>The AhR: A regulator of liver fibrosis?</b></p> <p><u>Xavier Coumou</u><sup>1</sup>, Stéphane Pierre<sup>2</sup>, Aline Chevallier<sup>2</sup>, Fatima Teixeira Clerc<sup>3</sup>, Ariane Ambolet Camoit<sup>2</sup>, Linh Chi Bui<sup>2</sup>, Anne Sophie Bats<sup>4</sup>, Jean Christophe Fournet<sup>5</sup>, Pedro Fernandez Salguero<sup>6</sup>, Robert Barouki<sup>7</sup>, Sophie Lotersztajan<sup>3</sup>, Martine Aggerbeck<sup>1</sup></p> <p><sup>1</sup>INSERM UMR-S 1124, Toxicologie Pharmacologie et Signalisation Cellulaire, Paris, France  <sup>2</sup>Université Paris Descartes, Sorbonne Paris Cité, Paris, France  <sup>3</sup>IRMB, INSERM U955, Hopital Henri Mondor, 94010 Creteil, France  <sup>4</sup>AP-HP, Hôpital Européen Georges Pompidou, Service de Chirurgie Gynécologique Cancérologique, Paris, France  <sup>5</sup>AP-HP, Hôpital Necker-Enfants Malades, Service d'Anatomo-Pathologie, Paris, France  <sup>6</sup>Departamento de Bioquímica y Biología Molecular, Facultad de Ciencias, Universidad de Extremadura, Badajoz, Spain  <sup>7</sup>AP-HP, Hôpital Necker-Enfants Malades, Service de Biochimie Métabolique, Paris, France</p> <p><b>W09-3</b> <b>Small immune-modulating molecules interacting with the AhR system</b></p> <p><u>Dieter Schrenk</u> Food Chemistry and Toxicology, University of Kaiserslautern, Germany</p> <p><b>W09-4</b> <b>The aryl hydrocarbon receptor (AhR) and barrier immunity</b></p> <p><u>Charlotte Esser</u> IUF - Leibniz Research Institute for Environmental Medicine, Düsseldorf, Germany</p> <p><b>W09-5</b> <b>The intersections of AhR activity and oncogenic signalling</b></p> <p><u>Jan Vondracek</u><sup>1</sup>, Jana Svobodova<sup>1</sup>, Jirina Prochazkova<sup>1</sup>, Lenka Smerdova<sup>1</sup>, Marketa Kabatkova<sup>1</sup>, Miroslav Machala<sup>2</sup></p> <p><sup>1</sup>Institute of Biophysics, Czech Academy of Sciences, Brno, Czechia  <sup>2</sup>Veterinary Research Institute, Brno, Czechia</p>
11h00 - 11h30	Coffee Break
11h30 - 13h30 <b>AUDITORIUM I</b>	<p><b>Symposium S14: The impact of complexity on chronic disease from exposure to treatment</b></p> <p><b>Chairs:</b> Ali Esat Karakaya, Turkey, and Stefano Bonassi, Italy</p> <p><b>S14-1</b> <b>Disease networks and predictive methods for clinical data analytics</b></p> <p><u>Cesare Furlanello</u></p>

	<p>Predictive Models for Biomedicine &amp; Environment, Fondazione Bruno Kessler, Trento, Italy</p> <p><b>S14-2</b> <b>Emergence of new properties in the investigation of disease aetiology: The contribution of omics</b></p> <p><u>Toby James Athersuch</u> Department of Surgery and Cancer, Imperial College London, London, UK</p> <p><b>S14-3</b> <b>Advances in multi-omics approaches in chronic disease</b></p> <p><u>Ios Kleinjans</u> Department of Toxicogenomics, Maastricht University, The Netherlands</p> <p><b>S14-4</b> <b>Integrating genomic and clinical complexity for better patient outcomes</b></p> <p><u>Gerrit Meijer</u> Netherlands Cancer Institute, Amsterdam, Netherlands</p> <p><b>S14-5</b> <b>The big challenge of complexity for national health systems. How is changing the epidemiology of chronic disease</b></p> <p><u>Stefano Bonassi</u> IRCCS San Raffaele Pisana, Rome, Italy</p>
<p>11h30 - 13h30 <b>AUDITORIUM II</b></p>	<p><b>Symposium S15: New insights into the toxicity of commonly used pharmaceuticals</b></p> <p><i>Chair: Martin Wilks, Switzerland, and Heather Wallace, UK</i></p> <p><b>S15-1</b> <b>Toxicity of the psychotropic drugs: Role of transporters at the blood-brain barrier</b></p> <p><u>Bruno Mégarbane</u> Department of medical and toxicological critical care, Lariboisière Hospital, INSERM U1144, Paris-Diderot University, Paris, France</p> <p><b>S15-2</b> <b>Paracetamol (acetaminophen) overdose: Are current recommendations for treatment with N-acetylcysteine satisfactory?</b></p> <p><u>Simon Hugh Lynton Thomas</u> Medical Toxicology Centre, Institute of Cellular Medicine, Newcastle University, Newcastle NE2 4HH, UK</p> <p><b>S15-3</b> <b>Colchicine-related life-threatening toxicity: Risk factors and management</b></p>

	<p><u>Philippe Hantson</u> Department of Intensive Care, Cliniques St-Luc, Université Catholique de Louvain, Brussels, Belgium</p> <p><b>S15-4</b> <b>Antidotes for direct oral anticoagulants</b></p> <p><u>Ismail Elalamy</u> Hôpital Tenon UPMC Inserm UMRS-938 Paris, France</p> <p><b>S15-5</b> <b>Toxicological and pathological findings in opioid-related deaths</b></p> <p><u>Henrik Druid</u> Department of Oncology-Pathology, Karolinska Institutet, Stockholm, Sweden</p>
<p>11h30 - 13h30 <b>AUDITORIUM III</b></p>	<p><b>Symposium S16: Risk assessment of metals via inhalation: Challenges and new developments</b> <i>Chair: Violaine Verougstraete, Belgium, and Yalçın Duydu, Turkey</i></p> <p><b>S16-1</b> <b>Risk assessment of aetals via inhalation: Challenges and new developments</b></p> <p><u>Steven Verberckmoes</u> Umicore, Brussels, Belgium</p> <p><b>S16-2</b> <b>Concepts of adversity in inhalation hazard assessment of metals</b></p> <p><u>Gary R Burleson</u> Burleson Research Technologies, Inc., Morrisville, North Carolina, USA</p> <p><b>S16-3</b> <b>How can bioaccessibility testing add value in the inhalation hazard assessment?</b></p> <p><u>Vanessa Viegas</u> The Cobalt Development Institute, UK</p> <p><b>S16-4</b> <b>The issue of lung overload of inert insoluble dust. How can prediction modeling contribute in risk assessment?</b></p> <p><u>Len Levy</u><sup>1</sup>, David B Warheit<sup>2</sup> <sup>1</sup>Institute of Environment and Health, Cranfield University, UK <sup>2</sup>Chemours Company</p> <p><b>S16-5</b> <b>The human equivalent concentration: A valid approach in extrapolating animal data to the human situation</b></p>

	<p><u>Adriana Oller</u> NiPERA, Inc, Durham, NC, USA</p> <p><b>S16-6</b> <b>Closing remarks</b> Steven Verberckmoes <i>Umicore, Belgium</i></p>
<p>11h30 - 13h30 <b>MADRID</b></p>	<p><b>Workshop W10: Design and interpretation of testing according to the extended one generation reproductive toxicity study for regulatory use</b> <i>Chair: René Hunziker, Switzerland, and Bruno Hubesch, Belgium</i></p> <p><b>W10-1</b> <b>The extended one generation reproduction toxicity study: Expectations for the new guideline, opportunities, threats</b></p> <p><u>Aldert Piersma</u>, Andre Muller National Institute for Public Health and the Environment RIVM, Bilthoven, The Netherlands</p> <p><b>W10-2</b> <b>First experiences from testing according to the EOGRST method</b></p> <p><u>Ivana Fegert</u> Regulatory Toxicology Pesticides, BASF SE, Ludwigshafen, Germany</p> <p><b>W10-3</b> <b>Changes introduced with the new OECD 443 method and implications on the toxicological interpretation</b></p> <p><u>Jochen Buschmann</u> Department of Reproductive Toxicology, Fraunhofer Institute for Toxicology and Experimental Medicine, Germany</p> <p><b>W10-4</b> <b>Using EOGRTS under REACH, BPD and CLP</b></p> <p><u>Hannele Huuskonen</u> European Chemicals Agency, Helsinki, Finland</p> <p><b>W10-5</b> <b>The role of the EOGRTS in product safety assessment in industry</b> <u>René Hunziker</u> Dow Europe GmbH, Cefic LRI, The Switzerland</p>
<p>13h30 - 14h00 <b>AUDITORIUM I</b></p>	<p><b>Closing Ceremony and Awards Presentation</b></p>
